In addition to covering troubleshooting issues on database design and use, this text explores Access 97's new Internet functionality and collaboration with other Office 97 products. Features of the book include: a Top Ten FAQs chapter from Stream International's database (appearing as the first chapter of the book); an @at-a-Glance page at the beginning of every chapter which sets the stage and provides an overview of the chapter's contents; the text is further annotated by Author Notes, Tips and Warnings - special pieces of wisdom that supplement the straight how-tos; a Time-Saving Tricks chapter, with the emphasis on undocumented material; and a listing of the most common error messages and their solutions in the final chapter.
