

Jennifer Bennett has lived lilac country for more than 20 years, and is well placed to appreciate the lilac, which not only flourishes in cultivated gardens but roams wild across the countryside. Tracing the journey of a plant that will grow well everywhere, in every soil, from its origins in Asia through Europe and the United Kingdom to North America some 250 years ago, Bennett brings this most familiar and glorious of flowers to vibrant life. The lilacs bloom is a sign of spring everywhere, but a lesser-known fact is that its emerging flowers are also used as indicators by farmers planning pest control and crop plantings and by scientists engaged in charting global warming. Filled with uncommon information about this common plant, Bennetts book features chapters on its history; planning, planting and pruning; the lilacs place in the landscape, whether alone, in groupings or with perennials; a species list of usual and unusual plants, with names that range from Charles Lindbergh and Martha Stewart to Charm and Glory; exotic lilacs for the adventurous connoisseur; and lilac aid, which addresses one of gardenings most vexing questions: Why wont it bloom? Lilacs for the Garden is a compendium of essential information for all who cherish this most resonant of garden companions. Whether you seek detail on plant requirements, mulching, grafting, fertilizing, multiplication, bloom time, fragrance, abiotic and biotic stresses, renovating neglected lilacs or a list of recommended species and where to find them, Bennetts latest book is an essential resource.

The Doctors Family (Mills & Boon Love Inspired) (Rocky Mountain Heirs, Book 3), Racing Supercars (Mean Machines), Exploring the Deep, Dark Sea, Platero y Yo (Spanish Edition), The Gloriosa, John Gabriel Borkman: Schauspiel in vier Akten (German Edition), This Is My Faith: Hinduism (This Is My Faith Books),
