

Elton John is a world renowned artist and his singing career has spanned many decades and being popular worldwide has brought about various memorabilia associated with this much loved musician including records, clothing, CDâ€™s etc. But, possessing an item of Elton John memorabilia does not necessarily mean that these are worth a great deal of money. On the other hand if your piece of memorabilia is sufficiently rare it warrants a decent sum of money. A modern signed CD from this living singer may have sold over a million copies but if Elton John had only signed a handful this will naturally make them more collectable and hence increase its value. Bear in mind that the artist is still alive and well and could still sign more copies if they were presented to him to be autographed then value could decrease slightly. This eBook aims to give a brief indication of collectable Elton John memorabilia with recent prices obtained at reputable auction houses.
